The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/773,625	Applicant(s) MULLER, ALBERT F.	
	Examiner David A. Redding	Art Unit 1744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

Claim Objections

Claims 1-10 are objected to because of the following informalities: the claims specify, "a hollow arcuate duct having a lower end adapted to be secured to a top surface of the nozzle..." A reading from the specification describes the duct as being a part of the nozzle, integral to the nozzle, not "adapted to be secured". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by USP 4,091,496 ('496).

The '496 patent discloses a nozzle body 1, a hollow duct 7 connected to the top surface of the nozzle body 1, and a hollow tubular hose connector 8 pivotally mounted within the duct 7. Since duct 7 is pivotally mounted upon the nozzle body 1, hose connector is pivoted, as claimed.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 353546.

Figure 1 illustrates the embodiment which is considered to read on the claimed invention. The figure shows a nozzle body 3, a hollow arcuate duct 2, connected to the nozzle body and a hollow tubular hose connector 7 which is pivotally mounted within the duct 2. Figure 1 shows, in dashed lines, the connector pivotal in a vertical plane about a horizontal axis. Since the duct is also pivotally mounted, the duct can be raised to an angle of about 30 degrees with respect to the vertical axis.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 4,564,972 to Varin (Varin).

Figure 1 in Varin shows a nozzle body, a hollow arcuate duct 5, and a hose connector 24,25 pivotally mounted 30 at its lower end and slidingly engaged at its upper end with the duct 5.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Redding whose telephone number is 571-272-1276. The examiner can normally be reached on Mon.-Fri. 6:00 - 3:00.
